

LASER GUIDED VEHICLE (LGV)

AURIGA POLE REEL

DESCRIPTION

Auriga pole reel is a vehicle patented by OCME exclusively for the handling of industrial reels. The machine can handle reels through two types of gripping.

The first one involves the union of the forks which, by entering the core of the reel, allows its lifting and management inside the production area.

The second type of gripping involves the lifting of a bar inserted into the core of the reel.

This highly precise vehicle can also work on shelves up to 9 meters heights. Ideal for manufacturers of flexible packaging material.

AURIGA POLE REEL
ARE DESIGNED
TO TRANSPORT:

ANY TYPE
OF PRODUCT

Possibility to work at height

Maximum care in reel handling

*Possibility of handling several types
of reels and pallets*

LASER GUIDED VEHICLE (LGV)

OPTIONALS

BATTERY CHANGEOVER

- **FULLY AUTOMATIC CHANGEOVER**
- **MANUAL CHANGEOVER**
- **OPPORTUNITY CHARGING STATION**

BATTERY TYPE

- **LEAD-ACID BATTERIES:** monthly easy maintenance, reduced costs
- **NEXSYS BATTERIES:** pure lead, near-zero gas emissions during the charge, no maintenance required
- **LITHIUM BATTERIES:** fast charging, no maintenance required and no gas emission during the charge

FEATURES OF THE MACHINE

SPECIFICATIONS		AURIGA POLE REEL
Max unit load weigh*t (kg)		1000
LGV height* (mm)	H1	3500
Lifting height* (mm)	H3	6000
Max height lift mast* (mm)	H4	6670
Fork length* (mm)	FL	1150
LGV length* (mm)	L	3140
LGV width* (mm)	W	1700
Wheel base* (mm)	WB	1185
Max speed (mm/s)		1700
Max speed fork lift* (mm/s)		250
LGV weight with battery* (Kg)		5000

*Customizable
